

Your privacy is safe with us.

Your Smartphone Leaves You **Exposed**

- Hackers can eavesdrop on you through your camera and microphone
- WiFi & Bluetooth could be the path to your phone and private information.
- WiFi & Bluetooth are the preferred methods to extract your private information.
- GPS can be easily tracked, giving away your whereabouts
- Existing solutions do not provide adequate data protection

Sirotta ATHENA & UNIVERSAL Series

A smartphone case whose modular system is designed for users to be able to choose whether to disable their smartphone's microphone/camera recording, WIFI/Bluetooth access, and GPS tracking, while retaining full device operation.

- Prevents 3rd party eavesdropping using the microphone, camera, or GPS
- Blocks WiFi and Bluetooth channels from malicious attacks

**Standalone,
Hardware Product**

**iPhone & Universal
Versions**

**Detachable,
21 Hours of Battery Life**

*Can be adapted to other phones upon request
